FREQUENTLY ASKED QUESTIONS ABOUT WELLNESS SHOTS

How do they keep fresh for a long time without any additives or preservatives?

Flash pasteurization technique is used to preserve nutritional value and freshness of ingredients without use of preservatives and additives

What's the difference between shots and homemade fresh juice?

In addition to cold-pressed organic fruits and vegetables, Herby Wellness Shots contain herbal extracts and vitamins that cannot be found at homes and require expertise for usage. Moreover, homemade fruits and vegetable juices quickly start losing their nutritional value after air exposure and cannot be stored for a long time, while shots' freshness and nutritional value is preserved using flash pasteurization technique.

Why should I shake well before drinking?

As our shots do not contain any additives, herbs and pulps may naturally separate.

How many shots can I drink per day?

1-2 shots are recommended daily. Daily 1 shot is recommended for general support, and 2 shots are recommended for more support. Please check our product web page for more detailed directions of use.

Why glass bottles?

Using glass instead of plastic makes sure that no unwanted chemicals are leaking into our beverages.

Why are they only 60 ml?

Potent herbal extracts, vitamins, fruits and vegetables are combined in this 60 ml bottle in the right amount that is most effective. You can benefit from these high quality ingredients in just 3 sips.

Do they contain sugar or sweeteners?

Wellness shots do not contain added sugars or sweeteners. Their delicious taste comes from organic cold-pressed fruits.

Do shots need to be refrigerated?

Shots do not require refrigeration until after opening. Refrigeration is recommended if you prefer your shots cold. Once the lid is open, shot need to be stored in the refrigerator and must be consumed within 5 days.

Can I drink them everyday?

Yes, by consuming every day, you can feel the support of herbs fully.
